

History

Ancient Greece

Children will learn about who the Ancient Greek people were, when they lived and where and how they were able to establish their empire.

The children also compare and contrast the modern day Olympics with the Ancient Greek events.

In addition to this they learn about Ancient Greek religion, research information about a variety of Greek gods and write their own Greek myth.

English

Aesop's Fables

From generation to generation, Aesop's fables have been read, taught and sung about.

At one point or another you would have heard of at least one of Aesop's fables.

Some of our favourites include "The boy who cried Wolf", "The Tortoise and the Hare" and "The Dog and the Shadow".

We will look at a different fable each week, looking deeper into the hidden meaning in the story and writing fables of our very own.

Geography

Tokyo

With the Olympic games being held in Tokyo this summer, the children will take a trip to the Japanese capital, learning all about the country, the people and the culture of this great city.

Currency, food and language are just the tip of the Skytree!!

Do any of our children have what it takes to become 'Ichiban'??

RE

Five Pillars of Islam

This term, children are going to take a look into the Muslim faith with an introduction into the Qur'an before learning the importance of the 5 pillars of Islam and the life and journey of Muhammed. We will then look at prayer mats and understand how they are important to Muslims before the children have an opportunity to create a prayer mat design of their very own.

Ancient Greece

D/T

Greek Printing

Using our research skills, the class will take a look at Greek printing work, traditionally found on pottery such as vases. The children will then create their own design and use some new and creative art techniques to have a go at their very own Greek printing.

PE

Athletics

Children will get the opportunity this term to become mini Olympians as they turn their hand to a number of different Olympic activities including track and field events such as running races, relays, throwing activities and jumping activities.

This will result ultimately in a mini Olympics day at the end of term.

Science

Muscles and the Affect of Exercise on the Body

With the Olympic games in mind, children will learn all about the body, our muscular system and the affects that sports and exercise have on the body. We will learn the names of some of the bodies largest muscles and how those muscles help to move the body during certain actions and sports.

Art

Parthenon Marbles

The children will become Ancient Greek sculptors this term as they take on the task of creating their own sculpture in the form of the Ancient Parthenon Marble Sculptures.

We will work with papier mâché to create our very own marble affect pieces of art to display in our classroom for all to see.
