

History

Stone Age to Iron Age

Rewinding time, children will become young archaeologists as they discover the Stone age, Bronze age and Iron Age.

We will look at the impact these historical times had on life in Britain as we research how early man survived in harsh environments.

Will we discover any hidden treasures of our own??

English

Poetry

During this topic, children will read, listen to explore and write many different types of poems. These will range from Limericks, Haikus, Tanka, Acrostic, Cinquain and Riddles.

Each week we will focus on one specific type of poetry as the children discover the rules of that form of poetry and then apply their learning to creating their own poem based on our topic of Earth Matters.

Will we uncover the next Thomas Hardy, William Shakespeare or William Wordsworth??

Geography

Marvellous Mountains

In keeping with our topic, the children will study the physical geography of mountains. Looking at their formation, famous mountain ranges and maybe even culminating in a mountain expedition of their own in our very own Lake District Mountain Range.

RE

Creation Stories

During this half term, we will study a range of creation stories from world religions so that we can sequence, compare and contrast the stories from each.

This will involve an in-depth investigation into several key religions creation stories.

Children will use a variety of different ways to present their work to help reinforce literacy and computing skills.

EARTH MATTERS

D/T

Mountain Structures

Using a range of art and design techniques, children will create their very own mountain or mountain range.

These will primarily use papier mâché or mod roc to create their structure before painting and finishing it off with finer details from our topic research.

PE

Rounders

Children will take to the pitch as they learn the skills and techniques required to pitch and bat in this great team game.

Small sided games and fun activities will promote the enjoyment and competitive nature of this classic British sport.

Science

Living Things and Habitats

Children will get out their magnifying glasses and take to the lab as they learn about living things and their habitats.

We will look into classification of animals and insects based on their characteristics.

This topic will end with a local area guide into living things and habitats.

Art

Landscapes and Watercolours

Children will look into famous artists impressions of mountain ranges and the use of watercolours to create realistic affects.

It will then be the turn of our budding young artists to plan and paint their very own watercolour mountain range picture using different artistic techniques.
